Why We Must Pay Reasonable Dividends

We aim to extend our system of local and long distance lines and add to our equipment from time to time to meet the requirements of the public for telephone service.

To make these extensions, we must obtain each year a considerable sum of money from the investing public. We do not make extensions out of profits as is usually done in a private business.

Unless we paid a reasonable return on the money now invested in our property, we could not get the new money needed each year for additions to our plant.

The investing public must feel confident that their money placed in our securities will bring them a reasonable return regularly or they will not buy more of our stock or bonds, through the sale of which we get money for extensions.

In the appropriation of \$18,000,000 by congress for a food survey Representative Philip P. Campbell of Kansas, asks the pertinent question, "What will the people get out of it?"

"The money appropriated in this bill will be spent," declared Mr. Campbell, "the people will have a report that nobody will read, and the food shortage will go on until the war is over." Mr. Campbell insists that what the farmers need is sufficient labor to till the soil, but instead they are given an army of investigators and theorists. In the words of another congressman, "The people are asking for bread and they are given a survey."

Lutheran Church Notes

The Salem ladies will meet at the home of Mrs. J. F. Leamer, 3824 Orleans avenue, Sioux City, Thursday, June 28. We hope for a fine day and a large attendance.

The congregational meeting at Salem was postponed one week, till Sunday, July 1st. First, because the constitution requires a four weeks notice to amend it and, second, because on account of the threatening weather there were only a very few people there. The 11 o'clock hour was so dark we had to light the lights at the pulpit.

A WORD TO THE FARM RENTER

Why not sow fall wheat on your own land this year and take all the profit that this crop is sure to bring you? Stop turning over 40 to 50% of your energies and their results to your landlord. Buy some of those splendid Southwestern Nebraska or Northeastern Colorado lands,—approved wheat lands at from \$20 to \$40 an acre. This is a hog and cattle country, too, with big profits coming from dairying because you can raise forage cheaply and ensilage crops plentifully.

We can send you right now carefully prepared leaflets, "Go to Southwestern Nebraska," "There's a Farm for You in Colorado," telling you all about these low-priced deeded lands, or if you want a stockraising homestead of 640 acres in Northeastern Wyoming, send for our "Free Government Lands Folder." It is my duty to help you get settled and there is absolutely no charge for my services.
